## The Affordable Cloud Business Phone System

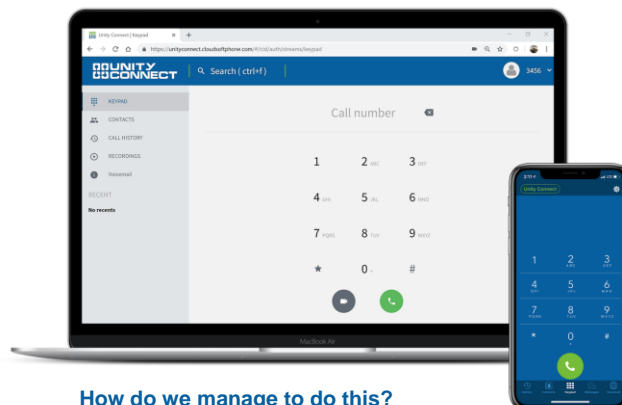

**Unity Connect** is a cloud phone system built for Canadian small and medium businesses.

Good communications is critical for business and small and medium sized organizations want a phone system that offers all they need while still affordable and simple to use.

With free mobile and desktop clients and a broad range of inexpensive handsets, **Unity Connect** is the perfect replacement for an aging PBX. We take care of everything, so you can focus on what you do best.

**Unity Connect** includes a mobile application for iPhone and Android phones. This allows businesses to support the BYOD trend, allowing employees to use a personal mobile phone while ensuring that all calls stay on the business network. Your employees can use one number for all incoming and outgoing calls with the **Unity Connect** mobile app. This makes it simple for customers and prospects to reach your employees with only one number to remember.

With all calls routed over the corporate network you also save on mobile and long-distance costs.

### How do we manage to do this?

**Unity Connect** is based in Canada – we charge in CAD\$ and not US\$ so you don't have to handle the varying exchange rate as with many other providers

We only offer one all-inclusive price – we haven't created several tiers and moved some key features into those higher priced tiers.

We source and price a variety of handsets that will all work with **Unity Connect** – many being very affordable handsets

We have one simple price per user.

**Unity Connect** is an all-inclusive business phone system. All our options include full support, MAC (Moves, Adds & Changes), all the costs to host the solution, updates and upgrades as well as Unlimited Local and Canadian Long Distance *(excludes Yukon, Territories, far North) \**

Compare that to owning your own system, the cost to manage, update, upgrade and power it; the cost of Telco lines/trunks, long distance, maintenance contracts and more.

\*One-time installation charges apply. One business phone number included, additional DID numbers or Toll Free numbers available.

## The Simplicity of a Cloud Phone System

**Unity Connect** is an all-inclusive business phone system.

**Trunks/lines:** You will not have to pay additional monthly fees for your lines, these are included in your monthly license fee.

**Local/LD Calling:** Unlimited Local and Canadian Long Distance to 90%+ coverage\* (excludes Yukon, the Territories and far North)

**MAC:** All your Moves, Adds and Changes are included.

**Maintenance:** No additional, costly maintenance contract is needed

**Conference Bridge:** Use your built-in conference capability rather than using expensive conference services

**Hosting:** We host your cloud phone system, so you have no server or phone system hardware to support on site

**Updates/Upgrades:** No costly future upgrade is required to continue using your phone system. They're included.

**FAX Server:** For those organizations that still rely on fax

## Powerful features

**Unity Connect** is a true replacement for your current phone system. At its core, **Unity Connect** is a cloud phone system that provides all the services you need to operate day to day:

- Auto-Attendant
- Call Park
- Follow Me
- Voicemail
- Conferencing
- Hunt Groups
- Hot Desking

...and many more that are delivered from a reliable platform.

By adopting **Unity Connect** as your phone system, you get predictable costs and scalable capabilities that free you to focus on your core competencies—not on the PBX in the closet.

You will feel confident that your phone system can grow with your business, regardless of geography, distribution and demographics.
